

THUNDER BLOOM

GENERAL DIRECTIONS

Indoor / Outdoor / Greenhouse:

Lightly spray leaves (tops and bottoms) with a handheld or backpack sprayer. Start 5 days before turning lights to a bloom cycle, switching to a bloom fertilizer or both. Spray once a day for 10 - 14 days then stop. The products must adhere to the leaves to soak in. Check to see if the product is beading up and rolling off leaves. If so, use a very small amount of a high quality spreader sticker products. Do not store diluted mix. Keep cool and out of sunlight.

Mixing Instructions:

Shake well. Add 1 3/4 teaspoons to each quart or liter of water. Mix well before spraying.

KEEP OUT OF REACH OF CHILDREN.

If swallowed, call a physician. Not responsible when used for purposes other than that described by label directions.
