

**WATER CONDITIONER**

8 fl. oz. (236.5 ml)

## WATER CONDITIONER

### Mixing Instructions:

Shake well. Add 3/4 teaspoon per gallon of water or 2 tablespoons per 10 gallons of water. Mix well.

### General directions for indoor / outdoor use:

**Soil:** Use the conditioned water to feed the plants. If fertilizing, add conditioner to water first, then mix in fertilizer and feed.

**Hydroponics:** Add conditioner to the water and mix in first, then add your favorite nutrients.

### ALSO CONTAINS NON PLANT FOOD INGREDIENTS:

50% humic acids derived from Leonardite.  
50% seaweed extracts

### What to Expect:

Increased yield and quality will be apparent when water conditions are suitable for plant growth.

Keep out of reach of children. Not responsible when used for purposes other than described by label directions.
